

RAM[®] Mounting Systems For ATV's & Cycles

Patented & Pat. Pend.

All RAM Mounting Systems come standard with a one inch diameter double ball and socket system. RAM Mounts and accessories are designed to withstand more than 50 g's of shock and will hold most any device including lights, radar detectors, cameras, cup holders, guns, hand held electronics, etc. rock solid even in the harshest of conditions. The patented rubber ball and socket design will protect gear from damage due to vibration. All these RAM components are 100% interchangeable so if you decide to switch from a light to a GPS unit simply turn the knob and presto your ready to insert the GPS cradle with ball into the socket arm. Additional components are available so that your GPS can be quickly and easily moved from your windshield, handlebar, deck or any other location that you want. Convenience and quality without a big dollar expense is what RAM brings along with lifetime warranties, protection and perfect viewing angles.
